

Occupational Therapy (OT): Occupational therapy provides treatment, support and care for people of all ages to develop, recover, maintain the daily living and work skills due to a physical, mental or cognitive disorder.

Physical Therapy (PT): Physical therapy helps people of all ages who may have medical conditions, illnesses or injuries that limit their regular ability to move and function.

Speech-Language Therapy (SL): Speech and language therapy provides treatment, support and care for children and adults who may have difficulties with communication, or with eating, drinking and swallowing.
